

A high-flying partnership to transform airport terminal hygiene

ZRH engaged **Microshare**® to manage software needs for **Taqt** and other IoT devices. Since early 2024, this has transformed Zurich Airport's cleaning and pest control operations.

**ZRH is World Travel Awards
"Best Airport in Europe"
for 21 years running**

- 32M passengers
- 3 terminals
- 800 washrooms
- 20% cleaning task reduction
- 10% FTE labor savings
- Clean as necessary, not as scheduled

THE PARTNERSHIP

- 38 airports · 11 countries
- Made in France · CE, IC & FCC certified
- 1-min install · battery-operated
- NFC attendance + feedback in one device
- 70,000+ devices installed globally

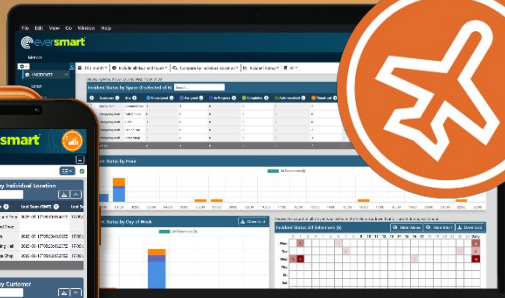

- IoT analytics - infrastructure, software & workflow
- Task dispatch · attendance · satisfaction data
- You own your data — full data sovereignty
- Predictive, not reactive (live + history + other sources)
- Open architecture — add any IoT source over time

The power of three

Taq, Zurich Airport and Microshare®

Co-developed with Zurich Airport, now offered to airports the world over

Tested and proven at ZRH

Co-developed at Zurich Airport, daily use by cleaning teams has been in full swing since Feb 2024. Cost and labor savings, customer satisfaction and stellar ratings.

Predictive not reactive

Know your facility's status - traffic, occupancy, attendance, consumables. Know what's really happening and needed, not just what passengers feel with a smiley face.

Data that matters

One airport language: gates, shifts, SLAs. Staff use it live, every day, and they get intel they understand, value and act quickly upon..

Prioritize and act

Live data + cleaning and pest activity history + flight schedules and other sources integrated so you can anticipate demand. We send the right data to the right people at the right time.

Peer-to-peer training

With onboarding led by ZRH experts on a peer-to-peer basis, we know how to get you started and transform your operations with expert guidance and trade craft.

Map your territory

Visual airport floor plan as the daily interface. Shift leaders see the full picture at a glance while software automates, relieves shift leaders, supports staff in real time.

Your data, your win

SaaS business model but you own your data. SOC 2 cyber certified and perfect for benchmarking FM providers, building better tenders and comparing historical performance.

Integrate other IoT devices

REST API connects to existing interfaces. New data sources and roles added easily onto one platform to steer the whole operation.
